

Rationalk PM - Project Management

Plan & organize the success of your projects

A simple tool to manage the company's project (s)
 We followed traditional project management approach and added modern agile concepts.

Rationalk PM allows :

- to plan any kind of project
- to assign tasks and work to colleagues
- to collaborate on project
- to harmonize the project management methodology within the company
- to handle project documentation
- to visualize and track the status of all project in a single management dashboard

Rationalk PM is used by :

- management board (project portfolio view with metrics and KPI)
- project managers (single project view with clear indicators on tasks and project logs)
- project team members (agile view with todo list and appropriate documentation)

The screenshot displays the Rationalk PM interface with several key sections:

- Résumé (Summary):** Project details including customer name (JESA), local folder, and search results.
- Logs:** A section for project logs, currently showing "No project logs to show yet."
- Fichiers projet (Project files):** A section for project documentation, showing "SP15006 - Specification High Speed test Bench Super Precision bearing" and a note that no files are attached.
- Gantt:** A Gantt chart showing task dependencies and timelines across a date range from 10.09 to 04.11.17.
- Mes tâches (My tasks):** A table listing tasks assigned to the user, including details like priority, end date, title, actions, project, meeting minutes, status, POCA, and opened by.
- Tâches assignées aux autres (Tasks assigned to others):** A table listing tasks assigned to other team members with similar details to the 'My tasks' table.
- Statistiques projets (Project statistics):** A section featuring a pie chart titled "Open tasks assignees distribution" showing the distribution of open tasks among assignees.
- Temps passé sur le projet (Time spent on the project):** A section for activity and time tracking, showing the current user's activity on a specific task.
